

Urban landscape

Hyde Park

In the pictures you can see Hyde Park, which is a royal park. It is one of Central London's gigantic landscapes with over 4000 trees, a lake, a lot of fountains, a meadow, horse rides and boat trips, the “Holocaust Memorial” or the “Upside down tree” in the picture.

Other aspects are the different opportunities to do sports in the park and frequently there are events.

Hyde Park has 142 hectares but the river “Serpentine” separates it in two.

Under no circumstances does it look as if like you are in the middle of London. In any case the people have a place to relax and have fun.
